Decent Q1FY25; Growth Projects on Track

Est. vs. Actual for Q1FY25: Revenue – BEAT; EBITDA/t – BEAT ; PAT – BEAT

Change in Estimates post Q1FY25

FY25E/FY26E: Revenue: 0%/0%; **EBITDA:** -4%/0%; **PAT:** -4%/0%

Recommendation Rationale

- **Growing EBITDA/t trajectory:** The company has maintained its earlier sales volume growth guidance of 30%-35% YoY (over 342 kt in FY24) in FY25, while targeting YoY growth in EBITDA/t in FY25 (From Rs 4,452/t in FY23). It will add colour-coated lines, galvanising lines, and DFT lines (which will add VAP products with higher EBITDA/t of over Rs 7,000). This will lead to an improvement in VAP share (40% target for FY25 vs. 29% in FY24) and higher EBITDA/t. DFT lines will come online from Q2FY25 and overall VAP share will improve from H2FY25. Volume growth will be skewed in H2FY25.
- **Product adjacencies and backward integration to enhance product profile:** Nabha Steels, at Mandi Gobindgarh, Punjab, (2 Ltpa capacity, 67% stake) phase-I of 0.6 Ltpa capacity is now ready to supply HR coils to the Mandi plant for backward integration at the plant (will add EBITDA/t of Rs 2,000/t at Mandi). It will be consolidated as a subsidiary from Q2FY25 and will start contributing to Mandis captive requirement. In Q1FY25, PBT of ~Rs 96 Lc from 10.72kt of external sales (unsuitable for captive consumption) from Nabha was included in P&L (accounted as partnership firm).
- **Demand scenario:** In Q1FY25, demand from government's orders was sluggish due to suspension of orders from Jal Jeevan mission and other orders on account of elections. Management said that there is some pick up in demand now, however, a major boost to demand is expected post the budget.

Sector Outlook: Positive

Company Outlook & Guidance: 0.56 MT to 1 MT expansion is on track and will be complete before FY25. DFT facilities of 2 Lc tonnes are on site now (out of the total DFT set up plan of 4 Lc tonnes) and will start operations from Q2FY25. The company's target for expansion from 1 to 2 mtpa is by FY28 and is on track.

Current Valuation: 23x P/E on FY26E EPS (Unchanged)

Current TP: **Rs 260/share** (Unchanged)

Recommendation: We **maintain** our **BUY** rating on the stock.

Financial Performance: JTL Industries reported a decent set of results. Revenue (up 2%/11% YoY/QoQ) beat our estimate by 6% driven by higher sales realisation. The company has already reported sales volume earlier at 85.7kt (up 11%/5% YoY/QoQ). Sales realisation (down 8% YoY, up 6% QoQ) surprisingly stood ahead of our estimate by 6% despite benchmark steel HRC prices (trader's market ex-Mumbai) were flat QoQ (down 6% YoY) and VAP share was also flat QoQ at 25%. The company has produced more thinner and smaller gauges leading to lower VAP volumes, but these thinner gauges fetched higher realisation and margins. EBITDA grew by 12%/8% YoY/QoQ, 10% beat on our estimates, led by higher topline. EBITDA/t (up 1% YoY/3% QoQ) stood ahead of our estimates by 10% at Rs 4,632/t. PAT stood at Rs 30.7 Cr (up 21%/4% YoY/QoQ), beating our estimates by 12%, led by higher EBITDA, lower D&A, interest expense and higher other income.

Outlook: With the phase-wise volume expansion in progress, we model Revenue/EBITDA/PAT CAGR of 37%/48%/46% over FY24/26E. We keep our FY26 estimates unchanged.

Valuation & Recommendation: We **maintain our BUY rating on the stock** and value JTL at 23x (Unchanged) of our FY26 EPS to arrive at our Mar'25 target price of Rs 260/share, implying an upside potential of 16% from the CMP.

Key Concall Highlights

- **Exports volume:** In Q1FY25, exports volume stood at record high at 5.9kt, representing 6.9% of total sales. This marked a growth of 31% YoY and an increase of 27% QoQ. The company is exporting from its Mangaon plant in Maharashtra which is near Nhava Sheva port. With the increase in SKUs with the installation of the DFT at Mangaon, the company expects certain export markets to open up, leading to organic growth in exports volumes.
- **Primary vs secondary mix:** JTL derives 50% of its sales from sourcing primary steel. Specifically, for primary steel, JTL procures hot-rolled (HR) coils from JSW and Tata Steel for its Derabassi (0.1 mtpa) and Mangaon plants (0.2 mtpa). The Raipur plant (0.1 mtpa) utilizes steel billets to manufacture narrow gauge coils, while the Mandi plant (0.2 mtpa) acquires secondary coils, known as "Patra," for pipe production (Mandi will source its HR coils from Nabha steel from Q2FY25). Traditionally, lighter gauge steel products (upto 2 mm) have relied on secondary coils, whereas newer stock-keeping units (SKUs) are transitioning towards primary steel. As JTL expands, its product mix is expected to incorporate more primary products. Nonetheless, secondary steel usage will persist, particularly for low-end product applications.
- **Sales mix:** Majority of the company's sales mix is from the dealer network sales (50-55%), ~15-20% is from government, OEM and EPC forms ~20% of the sales volume and the remaining is from exports. In the last quarter, less than 15% sales volume was from the government.
- **Other update: Jal Jeevan mission** had a total budget of ~$7 Bn (out of which ~$1.5-2 Bn was related to the structural steel sector) in FY24. The management said it expects a similar allocation from the government this year which will drive the structural steel demand. **QIP:** Rs 500 Cr QIP – as of now no update on it.

Key Risks to Our Estimates and TP

- Volatility in the steel prices will drive destocking at the dealer's end, impacting EBITDA/t.
- Lower-than-estimated demand scenario to hamper the off-take of volumes, impacting our sales volume growth forecasts.
